Anisha Pradhan

Brahmapur, India anishapradhan2005@gmail.com +91 9938463515

ABOUT ME

Highly driven and detail-focused Computer Science Engineering undergraduate student with a solid background in IoT, AI/ML, and software development. I am eager to utilize my technical expertise, creative skills, and problem-solving abilities to contribute significantly to meaningful projects, all while continuously learning and growing as a professional.

EDUCATION

Bachelor of Technology 2026
Gandhi Institute of Engineering and Technology University, Gunupur, India
- *GPA*: 7.89/10.0

Intermediate 2022
Takshashila Residential School, Brahmapur, India
- *Percentage*: 73.5

Matriculation 2020
K.C. Public School, Brahmapur, India
- *Percentage*: 75

PROJECTS

A Voice Driven Prescription Generation System
- Developed an AI-powered system that converts doctors' spoken instructions into accurate digital prescriptions using Whisper speech-to-text, SpaCy NLP, and RxNorm validation. The system extracts medical entities, corrects drug names and dosages, and generates a clean, structured prescription format, reducing manual errors and improving clinical workflow efficiency.

Potato Leaf Disease Prediction System
- AI-Driven Potato Leaf Disease Prediction System is a smart solution that uses image processing and machine learning to detect and classify potato leaf diseases like Early Blight and Late Blight. It helps farmers take timely action to prevent crop loss, improve yield, and promote sustainable farming through AI-powered precision agriculture.

IoT-Based Weather Prediction System
- Built an IoT-based weather prediction system using sensors like DHT11, BMP180, and a rain sensor for real- time data collection. The ARIMA model provides accurate forecasts, displayed on a user-friendly interface. Integrated with an ESP8266 module, it ensures seamless cloud data transmission for remote monitoring and reliable weather updates.

Women Safety App
- Developed a women's safety app that allows users to report unsafe areas and send emergency alerts. It features a dynamic heatmap, panic button, and real-time location sharing. The app enhances community safety with GPS and notifications, providing a reliable, user-friendly solution to ensure personal security and awareness.

Online Voting System
- An online voting system allows secure digital voting with features like voter au-

thentication, role-based access, and encrypted, anonymous votes. Admins can manage elections and view results. Built with HTML, CSS, JavaScript, and secure back-end frameworks, it ensures efficiency, transparency, and robust security to prevent tampering and ensure integrity.

INTERNSHIP PROGRAMS

- Successfully completed a summer internship at NIT Rourkela on Data Science and Artificial Intelligence.
- Successfully completed a summer internship at Vanurtech Media Pvt. Ltd., Bhubaneswar on Mern Stack.

INTERNSHIP PROJECTS

Heart Disease Prediction System

- Built a project on heart disease prediction using ensemble learning techniques, integrating algorithms like Random Forest, Gradient Boosting, and Voting Classifier for improved accuracy. By analyzing clinical data such as age, blood pressure, and cholesterol, the system effectively identified risks, demonstrating the power of ensemble methods for early diagnosis. Developed Skills - Python using Ensemble Learning Techniques

Book Management System

- Built a full-stack Book Management Web App using the MERN stack to perform CRUD operations on book data. Implemented search, filter, detailed book views, and responsive design for mobile and desktop. Ensured seamless frontend-backend integration via RESTful APIs. Developed Skills: React.js, Node.js, Express.js, MongoDB, REST API, Tailwind CSS, React Router, State Management (useState, useEffect).

SKILLS

Technical Skills

- Python
- Data Analytics
- Google Cloud
- Data Structures
- C/C++
- Algorithms
- Data Science
- Machine Learning
- Deep Learning
- Natural Language Processing
- MERN Stack

Soft Skills

- Communication
- Leadership
- Time Management
- Teamwork
- Problem Solving

Languages

- Odia: Mother tongue
- Hindi: Second language
- English: Very good

CERTIFICATIONS & AWARDS

- Cloud Computing by NPTEL
- Data Analytics using Python by NPTEL
- Internet Of Things (IoT) by NPTEL
- Introduction to Industry 4.0 and Industrial Internet of Things by NPTEL
- Certified in Java Full Stack Development (TNext_SE_25) from Wipro
- Completed 7-days Bootcamp with DevTown on Learn Web Animations using JavaScript
- Completed 7-days Bootcamp with DevTown Create Facebook Login using HTML & CSS

- Completed 7-days Bootcamp with DevTown Python and Artificial Intelligence
- Certification from Microsoft Learn Student Ambassador for the completion of Create Facebook Login Using HTML & CSS
